CAPTAIN WALTER V. FRICKE . . . . .	In charge of Detectives at night

# POLICE DEPARTMENT CITY OF CINCINNATI

COLONEL WILLIAM COPELAN  
CHIEF OF POLICE

Cincinnati, Ohio, January 14, 1930

COLONEL C. O. SHERRILL,  
*City Manager.*

Dear Sir:

Herewith is submitted the Forty-fourth Annual Report of the Cincinnati Police Department for the year ending December 31, 1929, it being the first annual report made in conformity with the standard for annual reports, as adopted by the International Association of Chiefs of Police, and recommended by the Bureau of Municipal Research.

The various statistical tables and graphs included in this report contain valuable data as to the crime situation and other police incidents occurring in this city during the year 1929.

The standard crime statistics furnish the necessary information pertaining to the crime situation in the city, enabling the department to determine the proper course of action in coping with the same.

A large percentage of the increase in crime during the past year, as over the preceding year, is due, it is felt, mostly to the extremely large number of persons out of employment during the latter six months of the year. The local situation is more acute on account of the large number of persons coming from other cities, seeking employment in this city, and all being wholly without means, become desperate and resort to crime for the purpose of securing funds.

## **GAMBLING Slot Machines**

The situation as to gambling during the past year has been very satisfactory to the department. The city is now practically clear of slot machines, that is, those that are used for straight gambling purposes. There are still a number of machines in operation in certain confectioneries and places of the kind, but they are used wholly as vending machines, and whenever an attempt is made to use them for gambling purposes prompt action is taken by the department.

A number of slot machines were confiscated, after securing proper evidence, and a number of suits were entered against the department for this action by promoters and others who are interested in making easy money.

## **Handbooking**

There has been a continual following up and vigorous prosecution of the handbooker by the department, and the situation at present is about as satisfactory as can be expected.

There are no known clearing houses for handbooks in Cincinnati. Practically all of these places are established in the various villages and towns adjoining the city.

Very little recording of bets is done, the telephone being used almost exclusively for the purpose of transmitting these bets to the headquarters outside of the city. Whenever the department finds a phone used for this purpose it is taken out. Thirty-four of these phones were removed during the year and the Telephone Company requested not to extend further service to these particular places, as they were using the phones for gambling purposes exclusively.

Ninety-three arrests in connection with handbooking were made during the year.

Other forms of gambling, such as craps, cards and the like, were also given close attention.

## PROHIBITION

The department has used its utmost endeavors in enforcing the prohibition law. If there has been any change in the situation, as compared with the year 1928, it is felt that it is for the better; but, as stated in previous reports, it is a never ending problem, and the department is doing the very best it can by way of enforcement.

The total number of arrests for violations of this kind during the year was 2,882.

There were approximately 6,827 gallons of liquor, 7,296 gallons of beer, 600 gallons of wine and 530 bottles of ginger confiscated and destroyed during the year. In addition to this there were 93 automobiles confiscated and sold on order of the court, the drivers of these machines having been caught violating the law in transporting liquor.

The department received a jolt in its effort at enforcement of the prohibition law during the latter part of the year by reason of the state law restricting the issuance of search warrants to judges exclusively. The procedure is: If the department wishes to secure a search warrant, it is necessary for the patrolman or officer to appear at the office of the Clerk of the Municipal Court and file an affidavit; then take a copy of the same and locate the Judge of the Municipal Court, wherever he might be; then, if he signs the warrant, go back to the clerk's office for recording and then to the premises to be searched. It can be readily seen that this procedure entails a lot of lost time on the part of the police and enables the suspect to do away with all evidence on or before the arrival of the police. It has been held by certain judges that it is necessary for the police to make a purchase of liquor on the premises suspected before a warrant will issue for a search of the same. This, of course, is out of the question and impossible for the police to carry out except in very rare cases. It is felt that the falling off in the number of arrests for liquor violations in the latter part of the year has been due almost wholly to this change in procedure.

## SOCIAL EVIL

The quarantine system established by the Health Department during the year 1928, designating the City Workhouse as a quarantine hospital for persons with infectious diseases, has been very effective during the year, reducing the number of streetwalkers and common prostitutes going at large.

There were approximately 2,010 persons arrested and charged with being common prostitutes, at least 30% less than the previous year.

While prostitutes still abound, there are no known or tolerated houses of prostitution in the city. Each and every attempt to establish one of these houses meets with prompt response on the part of the police.

## **TRAFFIC**

There has been no change by the department in the methods of handling traffic during the year.

Traffic is, without question, the outstanding problem in policing the city, and requires the utmost attention on the part of the entire police force. At certain periods of the day practically every patrolman in the department on active duty is stationed at one place or another for the sole purpose of enforcing the traffic regulations and protecting children and others at street crossings.

The daily increasing number of automobiles on the streets keeps the problem just one jump ahead of the police. Some years ago it was felt that the abolition of parking on the streets would go a long way toward solving the congestion, due, as it was thought, to that situation entirely, but at the present time it is a question whether this will materially improve the situation or not. As it is, it is felt that the abolition of long-time parking will at least help the situation very much, and it is recommended that this be given very thoughtful consideration.

As evidence of the labor and time required on the part of the police in enforcing the traffic laws and ordinances, the records show upwards of 88,000 arrests and citations for violations of this kind during the year, of which 63,240 were for illegal parking and 2,775 for speeding.

## **POLICE TRAINING SCHOOL**

During the year three classes of police recruits, a total of seventy men, were trained and added to the force, filling vacancies, each class attending this school for a period of sixty days before entering upon the duties of patrolmen.

There has been added to the studies in this school, instruction in first-aid, both for recruits and the regular classes, given by competent professional men as instructors. Members of the last class of recruits having had fifteen hours of first-aid instruction, were awarded certificates of proficiency by the Red Cross. Members of all ranks are required to attend these classes and become thoroughly familiar with the methods in use in first-aid. The Majors, Captains, Lieutenants and Sergeants have been given a special course, and it is their duty at stated intervals during roll-call, to give instructions to the men under their command.

In the regular school classes the members are instructed in laws, ordinances, rules and regulations, evidence, topography, police procedure, crime prevention, revolver target practice, observation, discipline and courtesy.

## **DRILL**

In addition to the school classes, there were twelve company drills held during the spring of the year.

The Annual Inspection of the force was held on Plum Street in front of the City Hall, April 2nd, at which time it is felt that the force, as a whole, made a decidedly good showing.

## **DISCIPLINE AND MORALE**

The discipline and morale of the force is at a high peak and better than it has been for many years past. The various units of the department are working in hearty co-operation with each other and very effectively, and the conduct of the individual members, except those noted in Table 11-A of this report, has been remarkably good.

## **IMPROVEMENTS**

The following are the outstanding improvements in the department during the year:

### **Seventh District Police Station**

A new district station is now under construction, being located on the south side of Beecher Street, east of Stanton Avenue, and will take the place of the old Seventh District Police Station, Concord and Morgan Streets, which has become antiquated and not only outlived its usefulness, but is clearly improperly located for the business of the district.

The new station, which represents an investment of \$60,000, of which \$9,500 was paid for the land, will be ready for occupancy in the early part of 1930.

This station will be a model of its kind, not only architecturally, but also in its layout and convenience for the purpose for which it is intended.

### **Place of Detention**

The Women's Place of Detention has been moved from the top floor of the City Hall to the basement, adjoining the First District Police Station. This change certainly adds to the efficiency of the service and convenience in handling prisoners, as well as facilitating more direct communication between Detention, District No. 1 and the Municipal Court.

### **Radio**

The most outstanding improvement contemplated and now fully under way, is the installation of a radio system for the exclusive use of the police department. Three radiotricians have been added to the force and are now busy assembling and putting into shape the necessary instruments, and it will be their duty to care for the equipment and broadcast all police messages.

The department has secured a license from the Federal Bureau on a short wave length, and it is hoped to have the system in full operation within a very few weeks.

Experience in other cities has shown that radio in police work is invaluable, and it is the intention of the department to equip headquarters, each police district station and each and every police vehicle in use on the streets with a receiving set.

The police broadcasting station is now fully equipped and is located in a wing of the old Eden Park Pumping Station, which is being rebuilt for the purpose of housing the Fire Department's signal system.

### **Bureau of Records**

The uniform record system, as recommended by the Bureau of Municipal Research, was adopted and put into effect January 1, 1929. This change was a radical departure from the old system, and, as usual in such cases, it takes time to work out the details and necessary changes. However, it is felt the department is functioning very well, and it is hoped that the full benefits of the change will be reaped in a short time. As it is, this bureau is conceded to be ahead of mostly any of the departments in the country in point of being able to furnish information offhand in all crimes, incidents and the like, which come within the province of the police.

### **Motor Equipment**

Ten additional motorcycles were purchased in July and added to the squadron, which now consists of forty machines, manned by forty patrolmen, the quota being increased to ten additional patrolmen to man these extra machines.

Three additional touring cars (Buick) were purchased and added to the "Cruising Squad" during the year, making four cruisers now in daily use on the streets of the city.

One auto-patrol, eleven Ford coupes, three Ford phaetons and one Ford sedan were purchased during the year; also three unclaimed cars at public auction, a Jewett touring, Hudson sedan and Hudson coach, most of the foregoing by way of replacing cars rendered unserviceable, which were either sold or junked.

### **Police Power Conferred on Firemen**

On April 10th police powers were conferred on all members of the Fire Department, making this a valuable auxiliary to the police service, and the wisdom of this move has been demonstrated by the number of arrests and citations made and assistance rendered by the various members of the fire forces.

### **Statistics**

Appended herewith will be found the statistical crime reports and graphs, together with other information of police interest.

Respectfully,

WM. COPELAN,

*Chief of Police.*
